

KN95 mask Automatic production line

KN95 Mask automatic production line integrates nose bridge bar loading , knurled, printing (optional), mask band welding, Edge pressing, mask forming, cutting and uploading.

For the mask forming and banding are adopting automated ultrasonic equipment, only 1-2 workers are needed for 1 set whole production line.

Main Specifications

Dimension	970x110x220 cm Lx W x H
Capabilities	40~45 pcs/min
Voltage	220V-50/60 Hz
Power	18 kW
Labor	1-2 person
Equipment Weight	Approx. 2500 kg
Driving Mode	Servo driven
Controlling mode	PLC
Processing mode	Ultrasonic welding

Main Configu-

Servo Motor	Xinjie
Controlling system	Xinjie
Sensor	Panasonic/OMRON
Pneumatic components	SMC
Belt	MISUMI
Main Frame	Welding +Profile
Touch screen	Xinjie/Mitsubishi
Bearing	NSK
Screw	HIWIN
Safety guarding	REER

High Quality Short Lead-time Advanced technology resource
We are all fighters!
